

Wongso Block Ice Package

Wongso Block Ice Package (WBIP Series) is special units for producing block ice. This package consists of refrigeration unit, coil evaporator, ice can, agitator, and lifting devices. WBIP Series have been designed in simple version to suit customers' need. Block ice is hard and thick, not easy to melt, and convenient to storage and transport.

Our standard condition are evaporator in and out fluid temperature $-15^{\circ}\text{C}/-20^{\circ}\text{C}$, condenser water in and out temperature $30^{\circ}\text{C}/35^{\circ}\text{C}$. Secondary refrigerant uses Ethylene Glycol solution (mass concentration: 22%) or Calcium Chloride solution (mass concentration: 22%).

Standard iblock ice specification: 10 kg, 25 kg, 50 kg, 100 kg.

For any other conditions please contact us directly.

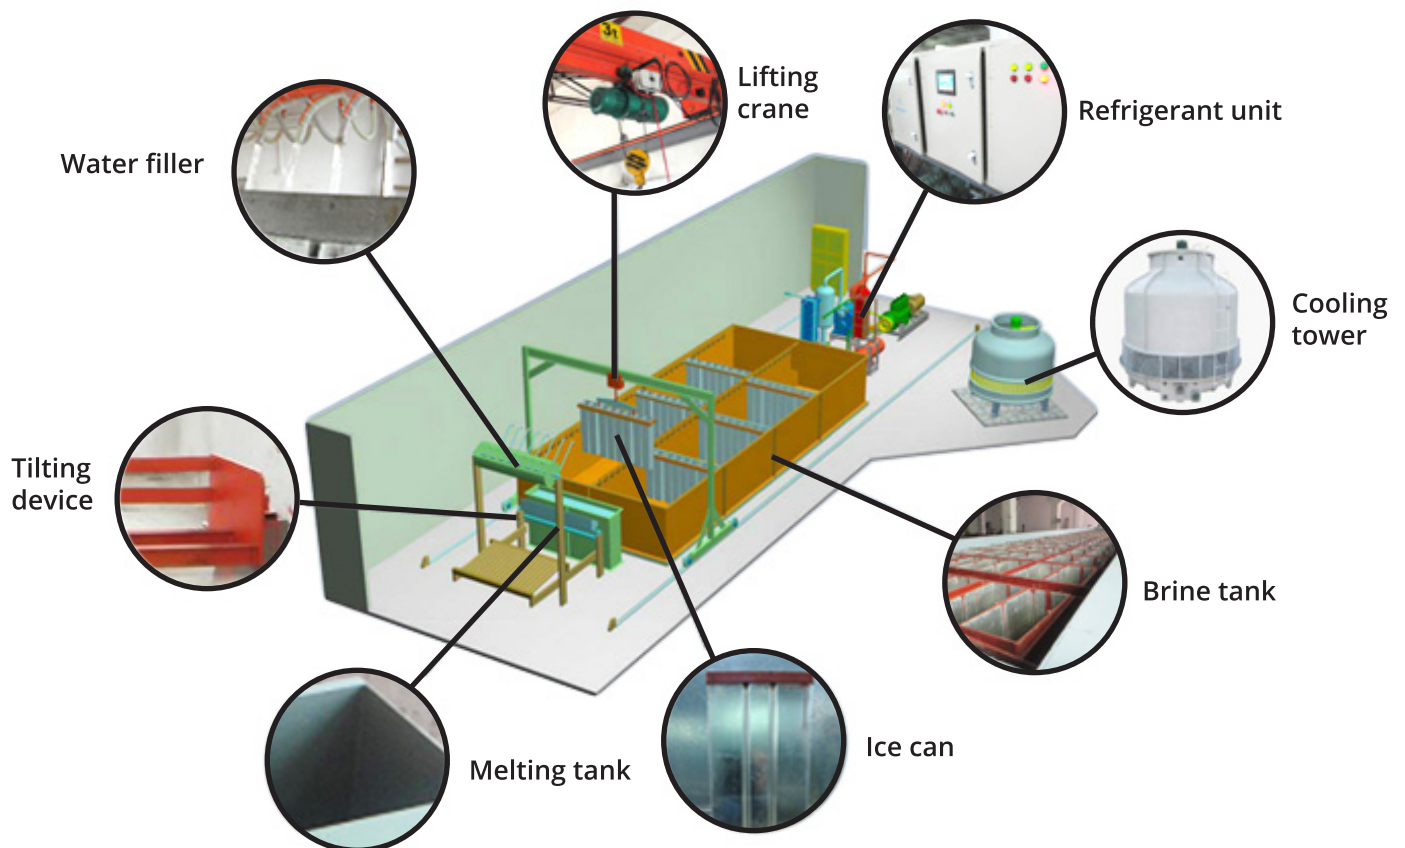

*Competent
solution for all
commercial
refrigeration.*
