

Wongso Flake Ice Package

Wongso Flake Ice Package (WFIP Series) is special units for the production of flake ice for small commercial, medium-scale industry and large-scale industry. This package consists of condensing unit (compressor and air cooled condenser or water cooled condenser), ice flake evaporator, and control panel.

WFIP Series have been designed in compact or split version depends on customers' need. In the compact version, the evaporator and condensing unit are fixed on a common frame with control panel. In the split version the condensing unit is housed and the control panel is remote. Our standard condition are using fresh water, refrigerant R404a, ambient temperature 25 °C, water inlet temperature 15 °C, and condensing temperature 40 °C.

For any other conditions please contact us directly.

Small commercial flake ice package are widely applied in supermarket, hotel, seafood market, food processing, vegetable preservation industries, etc.

Medium-scale industry flake ice package are professionally applied into poultry slaughter, aquatic processing, chemical printing, bio pharmaceutical, scientific experiments, etc.

Large-scale industry flake ice package are professionally applied into poultry slaughtering, chemical dyeing, nuclear power construction, water conservancy, hydropowder construction, traffic construction, etc.
